

*The recommendations from 6 citizens' juries/assemblies on climate change in the UK were tallied according to theme to find the 5 most important aspects of climate policy according to jury members.

1 TRANSPORT

- Reduce car use by making it easier to use alternative modes of transport such as cycling and walking, or use electric vehicles
- Improve accessibility, reliability, integration and affordability of public transport
- Take public transport provision back within public control

2 HOUSING

- New housing must be energy efficient and carbon neutral
- Buildings need to be retrofitted to increase energy efficiency
- All new housing to adhere to **Passivhaus standard**
- Provide training for retrofitting buildings and offer financial support for homes to be retrofitted

2 EDUCATION & AWARENESS

- Development of awareness and education campaigns for general public and schools, through social media and community groups to encourage action and make lifestyle changes

4 FOOD

- Reducing food waste from households and businesses
- Incentivise sale of local and seasonal produce
- More space for people to grow their own food
- Promote a plant-based diet

5 LEADERSHIP

- Climate change should be at the heart of decision-making and planning with greater transparency and accountability
- Give more power to local authorities to allow them to act on climate change
